Awards and Achievements

- Achieved 3rd place in a national-level programming competition in Tajikistan, competing against students from across the country, in my second year of high school (2021).
- Consistently secured 1st, 2nd, and 3rd places in regional and city-level programming competitions throughout high school (2020–2022).
- Won 1st place in the Innovation Forum focused on information technology, competing against over 100 participants, in both 2021 and 2022.

Aspiring software developer with hands-on experience in back-end development, full-stack development, and AI. Proven ability to develop robust software solutions and integrate AI technologies. I am seeking a challenging role where I can leverage my technical skills and passion for innovation to contribute to the success of a forward-thinking company. Available to start immediately, and open to part-time/remote opportunities.

Education and Qualifications

Bachelor of Science in Computer and Information Technology Aug 2023 - May 2027
Rochester Institute of Technology (RIT), Dubai

- Currently pursuing a Bachelor of Science degree in Computer Science with 3.3 CGPA.
- Dean's list student member
- Completed Courses: Introduction to software development, Calculus, Discrete Math, Computer System Concepts.

Work experience

Back-end developer May 2024 - August 2024
CJSC "Nashriyoti Muosir", Dushanbe

- Contributed to the development of the back-end infrastructure for the ecotaxi.tj platform.
- Involved in developing a comprehensive HR system for the company. Implemented server-side logic and APIs to support various front-end functionalities.
- Collaborated with front-end developers to ensure seamless integration and performance optimization.
- Participated in code reviews, testing, and deployment processes to maintain high-quality software standards.

AI developer Sep 2023 - Nov 2023
JASAIM, Dubai

- Worked on developing a genetic algorithm designed to assist in code writing.
- Contributed to the development of an algorithm aimed at training the system to write code in the Brainfuck programming language.
- Collaborated with the AI team to improve model accuracy and performance.
- Participated in research and development activities to explore innovative AI solutions.

Full-stack developer intern Jun 2023 - Aug 2023
CJSC "Nashriyoti Muosir", Dushanbe

- Fully created a working login system with comprehensive authorization, including both front-end and back-end components.
- Developed the front end using Angular and implemented back-end services with Node.js.
- Ensured secure and efficient user authentication and authorization processes.
- Collaborated with the team to enhance overall system performance and user experience.

Projects

- Ecotaxi.tj back-end logic:** May 2024 - June 2024 Implemented a service using SMTP protocol and XML library for better work with docx files.
- HRM System back-end logic:** June 2024 - August 2024 Collaborated with the team to fully build an HR system including authentication system using JWT and other services required.
- Authentication system:** June 2023 - August 2023 Completed a task on my internship to fully build an authentication system including back and front. Used token and hashing to build it.
- Genetic algorithm for AI development:** September 2023 - November 2023 Worked on a genetic algorithm to train an AI for writing code for the BrainFuck language.
